### PART I.

THE ORGANS OF VEGETATION . . . . .	1
Absorbents and exhalents considered . . . . .	56
Aculeus . . . . .	59
Bractæ . . . . .	47
„ same considered . . . . .	49
Buds, their use and the theories of recent writers disputed . . . . .	79
„ their probable origin . . . . .	81
Caudex, considered . . . . .	10
„ its several varieties examined and explained . . . . .	11
Culmus . . . . .	14
Cirrus . . . . .	47
Explanation of Plate I. . . . .	8
„ „ II. . . . .	9
Frons, or frond . . . . .	20
Fulcræ, considered . . . . .	45
Fibrillæ . . . . .	2
Glandula, considered . . . . .	65
Gemma . . . . .	73
“ its varieties . . . . .	76

	Page
Gleditsch's reason for comparing annual plants to Insects . . . . .	80
Hybernaculum, or winter quarters . . . . .	70
Ivy, an erroneous opinion combated . . . . .	48
Leaves, considered . . . . .	21
,, their anatomical structure . . . . .	23
,, ,, nomenclature . . . . .	27
,, ,, determination or disposition . . . . .	38
,, ,, insertion . . . . .	41
,, ,, direction . . . . .	43
<b>Objection to Ray and Pontedera's mode of dividing     plants . . . . .</b>	<b>81</b>
<b>Petrolus . . . . .</b>	<b>16</b>
<b>Pedunculus . . . . .</b>	<b>17</b>
<b>Prickles, their divisions and varieties . . . . .</b>	<b>60</b>
<b>Pilus, considered . . . . .</b>	<b>ib.</b>
,, its origin . . . . .	61
,, its varieties . . . . .	ib.
,, its forms upon various vegetables . . . . .	62
,, microscopic observations on same . . . . .	63
<b>Plants, which are destitute of buds . . . . .</b>	<b>79</b>
<b>Probable origin of buds . . . . .</b>	<b>81</b>
<b>Radix, or Root, considered . . . . .</b>	<b>1</b>
,, its various forms examined . . . . .	2
,, the manner of its growth described . . . . .	6
<b>Reasons for differing with Linnæus in regard to the     <i>Spina</i>, <i>Aculus</i>, and <i>Pilus</i> . . . . .</b>	<b>64</b>
<b>Scapus . . . . .</b>	<b>15</b>
<b>Stipes . . . . .</b>	<b>21</b>
<b>Stipula . . . . .</b>	<b>47</b>
,, same considered . . . . .	52
<b>Spina, or Spine . . . . .</b>	<b>56</b>
<b>Tendrils . . . . .</b>	<b>48</b>

## PART II.

	Page
THE ORGANS OF FRUCTIFICATION . . . . .	83
Amentum . . . . .	96—157
„ examples of same . . . . .	97
Anther . . . . .	123
„ physiological observations upon same . . . . .	ib.
„ its variety as to number . . . . .	125
„ its figure . . . . .	126
„ its direction . . . . .	ib.
„ its insertion . . . . .	ib.
„ its substance . . . . .	127
„ its proportion . . . . .	ib.
„ its means of protection . . . . .	ib.
„ its cellular character . . . . .	128
„ its situation . . . . .	ib.
Ala, or Wing . . . . .	149
Bacca, or Berry . . . . .	146
„ its forms . . . . .	ib.
Calyx . . . . .	84
Calyptra . . . . .	101
Corolla . . . . .	102
„ its approximation to the Perianth . . . . .	103
„ further observations upon same . . . . .	104
„ its various parts . . . . .	109
„ its subdivisions . . . . .	ib.
„ its regularity of parts . . . . .	110
„ its figure . . . . .	111
„ its margins . . . . .	113
„ its surface . . . . .	ib.

	Page
Corolla, its situation . . . . .	113
„ its duration . . . . .	ib.
„ its composition . . . . .	114
„ its colour . . . . .	115
Capsule . . . . .	141
Coma . . . . .	149
Cauda . . . . .	ib.
Crista . . . . .	150
Cyma . . . . .	155
Corymbus . . . . .	157
Capitulum . . . . .	161
Drupa . . . . .	144
Edible Mushroom, how distinguishable from the poisonous Fungi . . . . .	102
Filamentum . . . . .	120
„ its figure . . . . .	ib.
„ its insertion . . . . .	121
„ its proportion . . . . .	ib.
„ its surface . . . . .	122
„ its direction . . . . .	ib.
Folliculus . . . . .	144
Fasciculus . . . . .	161
Gluma . . . . .	100
„ its nomenclature . . . . .	ib.
Germen, physiologically considered . . . . .	137
„ its figure . . . . .	138
„ its surface . . . . .	ib.
„ its situation . . . . .	139
„ its insertion . . . . .	ib.
“ its proportion . . . . .	ib.
Involucrum . . . . .	92
„ its nomenclature . . . . .	95
Inflorescentia . . . . .	154
Legumen . . . . .	143

	Page
Mode of determining the number of Petals	108
Nectarium	115
,, its form and peculiarities	ib.
,, the term not satisfactory	118
Nux	150
Organs of Fructification	83
Objection to the term Gluma	100
Perianthium	85
,, its varieties	86
,, its nomenclature	87
Petals, their number giving a denomination to the Corolla	106
Pistillum, physiologically considered	130
Pericarpium	139
Pomum	145
Pappus	149
Propago	151
Panicula	159
,, its varieties	160
Pollen, its colour	129
,, its particles	ib.
Receptaculum	151
,, its varieties	152
,, its nomenclature	ib.
Racemus	158
Spatha	99
,, its nomenclature	100
Stamens	119
Stigma	131
,, its divisions	ib.
,, its figure	132
,, its proportion	ib.
,, its expansion	ib.
,, its duration	133

	Page
Stylus . . . . .	133
„ its proportions . . . . .	135
„ its divisions . . . . .	ib.
„ its figure . . . . .	ib.
„ its direction . . . . .	136
„ its situation . . . . .	ib.
„ its duration . . . . .	ib.
Siliqua . . . . .	142
Strobilus . . . . .	147—157
Seed, with observations . . . . .	148
Spadix . . . . .	154
Spica . . . . .	156
Spicula . . . . .	157
Thyrusus . . . . .	161
Umbella . . . . .	155
Volva . . . . .	101
Verticillus . . . . .	162

## PART III.

	Page
ON SYSTEM, OR CLASSIFICATION, WITH THE CHARACTERS, &c. OF THE CLASSES . . . . .	165
Association Æqualis . . . . .	208
„ Superflua . . . . .	209
„ Fru tranca . . . . .	ib.
„ Necessaria . . . . .	210
„ Segregata . . . . .	ib.
Algæ, Sea-weed . . . . .	232
<i>Character of the Classes, with the origin of their Orders, including the properties of the Plants composing the same . . . . .</i>	
	172 to 235
Cryptogamia, (Class XXIV.) . . . . .	229
<i>Derivation and Definition of the Classes tabularized</i>	169
Diandria, (Class II.) . . . . .	173
Decandria, ( „ X.) . . . . .	180
Dodecandria, ( „ XI.) . . . . .	182
Didynamia, ( „ XIV.) . . . . .	190
Diadelphia, ( „ XVII.) . . . . .	201
Dioecia, ( „ XXII.) . . . . .	221
Enneandria ( „ IX ) . . . . .	179
Ferns, their claim upon our reflection . . . . .	231
Fungi . . . . .	233
<i>Greek numerals</i> . . . . .	168
Gynandria. (Class XX.) . . . . .	217
Hexandria, ( „ VI.) . . . . .	177
Heptandria, ( „ VII.) . . . . .	178
Hepaticæ, . . . . .	233
<i>Introduction to Classification</i> . . . . .	165
Icosandria, (Class XII.) . . . . .	184
Lichens . . . . .	234

	Page
Monandria, (Class I.) . . . . .	172
Monadelphia, ( „ XVI.) . . . . .	198
Monogamia.	
Monœcia, (Class XXI.) . . . . .	220
Mosses . . . . .	231
Octandria, (Class VIII.) . . . . .	179
Observations upon Ferns . . . . .	231
Pentandria, (Class V.) . . . . .	175
Polyandria, ( „ XIII.) . . . . .	186
Polyadelphia, ( „ XVIII.) . . . . .	205
Polygamia, ( „ XXIII.) . . . . .	224
<i>Recapitulation of the Classes, enumerating their Orders by Examples . . . . .</i>	236
<i>System or Classification . . . . .</i>	167
Syngenesia, (Class XIX.) . . . . .	207
Triandria, ( „ III.) . . . . .	173
Tetrandria, ( „ IV.) . . . . .	174
Tetradynamia ( „ XV.) . . . . .	193

## PART IV.

EXPLANATORY ILLUSTRATIONS OF THE TWENTY FOUR CLASSES . . . . .	247
