

Reg. No. :	*
Name ·	

II Semester M.Sc. Degree (CBSS – Reg./Supple./Imp.)
Examination, April 2023
(2019 Admission Onwards)
BOTANY

BOT2 C 05: Embryology, Palynology and Plant Breeding

Time: 3 Hours

Max. Marks: 60

I. Answer any two of the following.

 $(2 \times 8 = 16)$

 What is endosperm? Explain its various types. Add a note on ruminate endosperm.

OR

- 2) What is apomixis? Explain in detail about the two main categories of apomixis. Add a note on its practical importance.
- Explain the various methods of breeding for disease and pest resistance in plants.

OR

Comment on the centers of origin of cultivated crops.

II. Answer any two of the following.

 $(2 \times 6 = 12)$

- Explain the four categories of polyembryony based on the origin of additional embryos.
- 6) Describe the structure of a mature angiosperm ovule. Mention the different types of ovules.
- Explain the applications of pollen morphology. Add a note on palynology in relation to taxonomy.
- III. Answer any six of the following.

 $(6 \times 3 = 18)$

- 8) Comment on the significance of pollen pistil interactions.
- 9) Describe the structure of anther wall layers.

P.T.O.

K23P 0457

- 10) Comment on melissopalynology.
- Explain the floral mechanisms favouring cross pollination.
- 12) What are the advantages of parthenocarpy?
- 13) Describe the structure of pollen wall.
- 14) Explain the process of terminator seed technology.
- Explain the approaches for germ plasm conservation of plant genetic materials.
- IV. Answer any seven of the following.

 $(7 \times 2 = 14)$

- Mention the different types of microspore arrangements in pollen tetrads.
- 17) List the functions of tapetum.
- 18) What are antipodals?
- 19) What is pollen allergy?
- 20) Comment on agents of pollination.
- 21) Write a note on obturator.
- Mention the achievements of mutation breeding.
- 23) What are genetically modified crops? Give an example.
- 24) Enlist the nutrient contents in honey.
- 25) What is plant quarantine?
